Quick Operation Manual

Shortcut Guide：

1.Install a battery

Open the battery bin cover ⑤ and load a single 18650 battery according to the positive and negative direction indicated by the fuselage.

2.Switch on and off

Press the power button ⑧ for 2 seconds to turn the camera on/off.

3.Debugging of thermal imagers

(1)When the scene target image is blurred, focus by turning the lens focusing ring ⑥ until the target image is clear.

(2) The focusing ring rotates clockwise for close focus and counterclockwise for far focus.

(3)If the image is still unclear, adjust the eyepiece focus ③ to match the visual distance
